WHO WE ARE

NORTH AMERICAN INDUSTRY LEADERS IN CUSTOM ARCHITECTURAL MILLWORK AND CASEWORK.

For over 35 years, exceptional quality and precise execution have defined our work. Clear communication, technical expertise, and a collaborative mindset define the CCW experience.

Operating from our 40,000+ square foot manufacturing facility in Waterloo, Ontario, every project is produced under our direct control. We are your single-source partner for fully integrated interior packages from millwork to metal fabrication, glass, acrylic, upholstery, and solid surfaces.

Our team of estimators, project managers, engineers, and skilled craftsmen works collaboratively with GCs, designers, and partners to bring complex interiors to life. From shop drawings and production to delivery and installation, accountability never leaves our hands.

PROUD MEMBERS OF

OUR SERVICES + CAPABILITIES

THE EARLIER WE'RE PART OF THE CONVERSATION,
THE MORE VALUE WE BRING.

Our teams deliver complex interior packages entirely in-house, overseeing every stage from fabrication to installation.

We integrate millwork, **metal fabrication**, **glass**, **acrylic**, **upholstery**, and **solid surfaces** into a **unified scope of work**, bridging gaps between trades and streamlining project coordination.

When a project requires something beyond the expected, we find the path to make it real because we build the complete design, not just the millwork.

OUR COMMITMENT TO SUSTAINABILITY

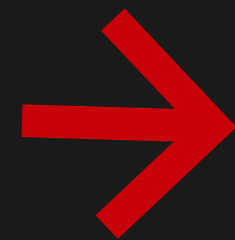

**OUR FSC® CERTIFICATION ISN'T JUST A LABEL,
IT'S A MARK OF RESPONSIBLE PRACTICE, AND IT'S BUILT INTO
HOW WE OPERATE.**

For us, that means integrating verified chain of custody and responsible sourcing into our millwork process so projects align with established sustainability and green building standards. It reinforces environmental stewardship without compromising precision, performance, or design intent.

For the teams we build alongside, it provides confidence that sustainability commitments are supported by documentation, accountability, and execution - not assumptions. It's one more way we ensure every project reflects our care, our standards, and our commitment to doing things right.
